

Import Data using Transform Maps

MODULE 06 OF 08

Enable Coalesce for Updates

Use Employee ID as the matching key to avoid duplicate employee records.

Phase 6: Enable Coalesce to Avoid Duplicate Records

- In real projects, the same employee data may be imported multiple times.
- To prevent duplicate employee records, we use **Coalesce**.
- The Coalesce will update the same records with new values if we add and the duplicate values are not inserted.

Steps:

1. Open Transform map Under System LDAP On All menus.
2. Open the Created Transform map , Name is Sample Spreadsheet Import.
3. Under Related list, select the Field maps Section and Make any one field Coalesce True which appears in False.
4. Now save the form.
5. Then again add some data which is in Excel format.

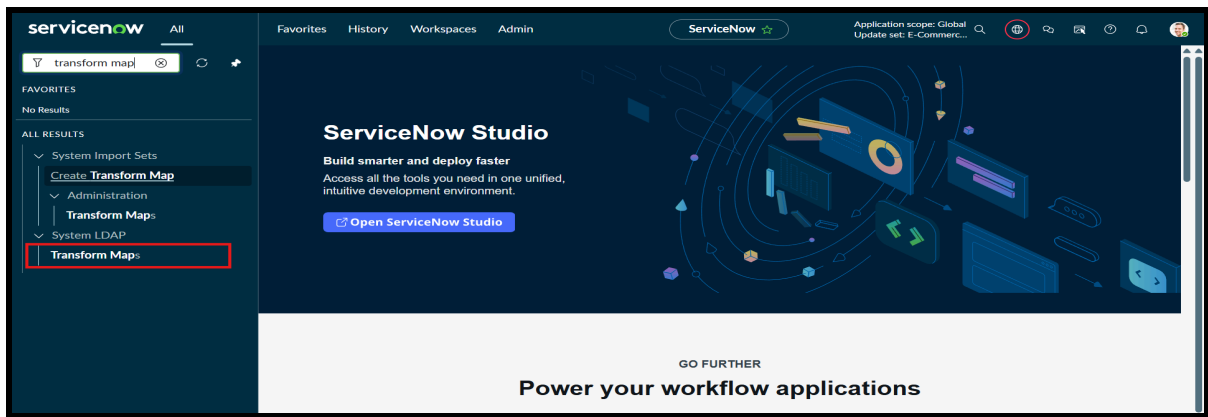

Table Transform Maps							
Updated							
Search							
Name	Source table	Target table	Run business rules	Order	Active	Updated	
Sample Spreadsheet Import	Employee Import [u_employee_import]	Employee Test [u_employee_test]	true	100	true	2026-01-19 03:46:08
