

Import Data using Transform Maps

MODULE 08 OF 08

Create Reports and Dashboard

Build employee reports, add them to a dashboard, and review the project outcome.

PHASE 8 : Create Reports on Employee Test Table

Navigation Steps :

- Open All menus, Search for **Reports**.
- Under **Usage and governance** Select Reports.
- Click the **New** button to create a new report.
- Create **3 Reports** as follows.

Report 1: Employees by Department

- In Data
- Report name : **Employees by Department**.
- Source Type : **Table**.
- Table : **Employee Test**, Now click the Next button.

Release Demand for Asset Release of Case	Feature Release [feature]	List	name	admin	2025-12-17 05:52:39	

- Now after Clicking next in type Select **Pie chart**.
- And click the **next** button.

- Now In Configure Select Group by **Department** Field.
- In the Aggregation Field Select **Count**.
- Then Click **next**.

- Now In Style Leave the Chart color by **default**.
- And Click the **Run** button to Execute the given data Report.
- And Click **save** button to Save the Report.

Report 2: Employees by Location

Configuration

- Table: Employee Test
- Type: **Bar Chart**
- Aggregation: **Count**
- Group By: **Location**

Steps :

1. Create a New Report.
2. Report name : **Employees by Location.**
3. Table Select : **Employee Test.**
4. Select Type : **Bar Chart.**
5. In Configure Select Group by Field : **Location.**
6. And Aggregation is **Count.**
7. Now Click **Run** to Execute the Report and Click the **Save** to save the Report.

Report 3: Employee List Report.

Configuration

- Create a New Report name : **Employee List Report.**
- Table: **Employee Test.**
- Select Type: **List.**
- In Configure Select Columns:
 - **Employee ID.**
 - **Employee Name.**
 - **Email.**
 - **Department.**
 - **Location.**
- Now Select **next** and no required to choose anything in **Style.**
- Now Click **Run** to Execute the Report and Click **Save** to Save the Report.

PHASE 9 : Add Reports to Dashboard

Create Dashboard

Navigation :

- Open All menus → Search for Dashboards.
- Under Self Service → Click Dashboards.
- On the top right corner Click Create Dashboards or /
- You can create Directly by using the backend name [PA_DASHBOARDS.FORM].
- Then Click New to Create new Dashboards.

- Only the backend name will open the form if the ACL has the **pa_dashboards** access to **Admin Overrides** True only.
- Then only we have access to the form.

- After Opening the ACL Search the **pa_dashboards** on Name Column.

Access Controls Name							
Name	Decision Type	Operation	Type	Active	Updated by	Updated	
pa_dashboards	Allow If	write	record	true	admin	2019-03-25 09:32:03	
pa_dashboards	Allow If	write	record	true	admin	2016-04-19 03:29:14

Applies To

Add Filter Condition

Add OR Clause

Conditions

Access Control Rules have two decision types, and these types will behave differently depending on conditions.

1. Allow Access: Allows access to a resource if all conditions are met. Additional ACLs may grant access to records where this ACL has not granted access.

2. Deny Access: Denies access to a resource unless all conditions are met. Additional ACLs may not grant access to records where this ACL has denied access.

More Info

Update

Delete

- Then Click Enable the True for Admin Overrides and Update the Form.
- Then the creation of dashboards will be possible by using the backend name.
- Now Open the **PA_DASHBOARDS.FORM** create dashboard.
- Dashboard name : **Employee Analytics Dashboards.**
- **Save** the Form.

Add Reports to Dashboards.

Navigation Steps:

- Open the **Previously Created Reports.**
- On All menus → type Reports Under **Usage and Governance** select **reports.**
- Open the **Employees by Department.**
- Select the **Edit Report** and Click the **Share** button then the right top corner Select the **Add to Dashboards** Option.
- Then Choose the Created **dashboard name** and Click **Add** button.

- Same Like that do the remaining **2 reports** in the same navigation how we added **Employees by Department**.
- The **Employees by Location** and **Employee List Report** these two reports are also added to the created dashboard.

Reports						
Title	Table	Type	Field Name	Created by	Updated	
Employee List Report	Employee Test [u_employee_test]	List		admin	2026-01-29 20:57:32

- After Opening the Report Click the **View Report** Button on the right side of the Context menu.

Report: Employees by Department

Please configure this report using Edit Report, and create new reports using View / Run.

Application: Global

Title: Employees by Department

Table: Employee Test [u_employee_test]

Field Name: u_department

Type: Pie

Chart size: Large

User: 6816f79cc0a8016401c5a33be04be441

Filter: Add Filter Condition Add OR Clause

Roles: [edit icon]

Buttons: Update View Report Edit Report Delete

SN.Utils.Versions (2)

- After Clicking the View Report button, Now Click the **Share** button and then share options are visible on the right side.
- Now click the **Add to Dashboards**.

- Now Add the Dashboard that you created called **Employee Analytics Dashboards**.
- Then Click **Add** button.
- Now the **Report** is added to the **dashboards**.
- Now, Same in the process, add the remaining **two reports** to the **dashboard**.

- From the + icon also we add widgets that our reports from there.
- If we want we can also configure the background color.

- Here the three Reports are added successfully by varying **Department , Location and List Report**.
- We can also restrict the **Users,Groups and Roles** From Share Option.

Conclusion:

1. This project successfully implemented an automated employee data management solution using ServiceNow Import Sets and Transform Maps, ensuring accuracy, efficiency, and data integrity throughout the employee onboarding and update process.
2. A key enhancement in this project was the use of Coalesce in the Transform Map. By enabling Coalesce on the Employee ID field, the system intelligently identifies existing employee records during every import. This prevents the creation of duplicate records and ensures that repeated imports update existing data instead of inserting redundant entries. As a result, the employee database remains clean, reliable, and consistent, which is critical in real-world enterprise environments where data may be imported multiple times from external systems.
3. In addition to data integrity, the project was extended with Reports and Dashboards to provide meaningful insights and real-time visibility into employee data and import activities. Custom reports were created to track:

- Total employee records.
 - Newly added employees.
 - Updated employee records.
 - Department-wise employee distribution.
 - Import success and error counts.
4. These reports were then consolidated into a Dashboard, allowing administrators and HR teams to monitor employee data trends, import performance, and data quality from a single centralized view. Dashboards improved decision-making by presenting information visually through charts and graphs, reducing the need for manual analysis.
